

SECURITY ALLIANCE
COMMAND CENTER

Since 1976, our dealers have entrusted the **Security Alliance Command Center** to provide first-class emergency and non-emergency monitoring services for the homes and businesses they protect. Today, SACC monitors sites throughout the Eastern seaboard from a central location in Virginia. Our monitoring center is manned 24 hours a day, 7 days a week, 365 days a year.

We are one of the largest and most respected monitoring centers on the East coast, and in being so, we must meet or exceed rigorous quality assurance standards set by Underwriters Laboratories, Inc. (UL). SACC maintains multiple backup power sources and our own systems must be tested on a weekly basis to ensure we can provide continual coverage for our customers.

We provide extensive background checks on all our staff, and they must undergo weeks of training and pass a course accepted by the Department of Criminal Justice Services. Once on board, our staff is fully trained in emergency response, and must react to every call within seconds.

You can trust **Security Alliance Command Center** to watch over the homes and businesses you protect.

SECURITY ALLIANCE
COMMAND CENTER

Security Alliance Command Center Offers A Total Security Package

In today's society, security is a number one priority. It is no longer enough to install an alarm in someone's home or business. For maximum protection, today's installations must be supervised by an off-site monitoring center 24 hours a day, 365 days a year.

Trust **Security Alliance Command Center** to help provide maximum protection.

Offer Your Clients A Total Security Package

Our monitoring services add value and security to your installations

Value Added Services

As a partner with Security Alliance Command Center, you are able to add value to the installations in your clients' homes and businesses, and add profit to your own bottom line.

Daily Tests*

To provide your clients with the peace of mind they deserve, and to ensure your systems are working properly, you can program your system to provide daily tests on all of your subscriber lines.

Instant Account Status Reports**

As a dealer, you can place an account "on test" or "off test," and check signals through our automated VRT telephone service.

* Include a Test Fee for this client service.

** Provide your clients with daily, weekly, or monthly reports.

You have access to your account information when you need it, without having to wait for an operator. Via the Internet, you can instantly check the account status, alarm histories, and subscriber information of your clients' accounts, and create reports.

Improved Security

As a partner with Security Alliance Command Center, you raise the level of security you provide your clients.

Quick Response

People often disregard audible alarms, so a monitoring service provides the extra layer of protection for your clients. Within seconds of receiving a problem report from your client's site, our trained staff springs to action — a quick response that can make the difference in a life-or-death situation like fire or carbon monoxide detection. Depending on the report type, we respond by contacting you, the property owner, and/or the proper authorities.

Backup Monitoring

When telephone lines fail, it is important to have an alternate communication path, like radio, Internet or cellular backup, to prevent service interruption. We are pleased to provide AlarmNet® services for both cellular and Internet monitoring.

Flexibility

Our system can provide monitoring services for a wide variety of control panels, and our responses, services and procedures can be customized to suit your clients' individual needs.

We help our dealers succeed

Competitive Pricing Advantages

We show our dealers how to use our competitive

pricing to generate recurring revenue. With added services, our dealers can profit from simple changes to their security programming, report generation, and daily signal reporting.

Flexible Billing Options

With flexible billing options, our dealers set up their accounts in a way that works for them and their clients.

Dealer Assistance

We train our dealers in sales and account management techniques, and demonstrate how to profit from services we offer.

Personalized Service

At SACC, our dealer partners are our most important priority. We have the ability to provide case-by-case customization and superior customer service. Nothing is more important than response, whether to alarms or to your needs.

When you call,
we respond.
